

Kickstand Extension

Increase side stand foot support

Applicable to BMW R1300GS (2023-)

High strength aluminum alloy CNC process

Better surface finish and precise hole placement.

Developed according to the original car data

Lossless installation design

Don't need to remove original side stand foot for direct installation.

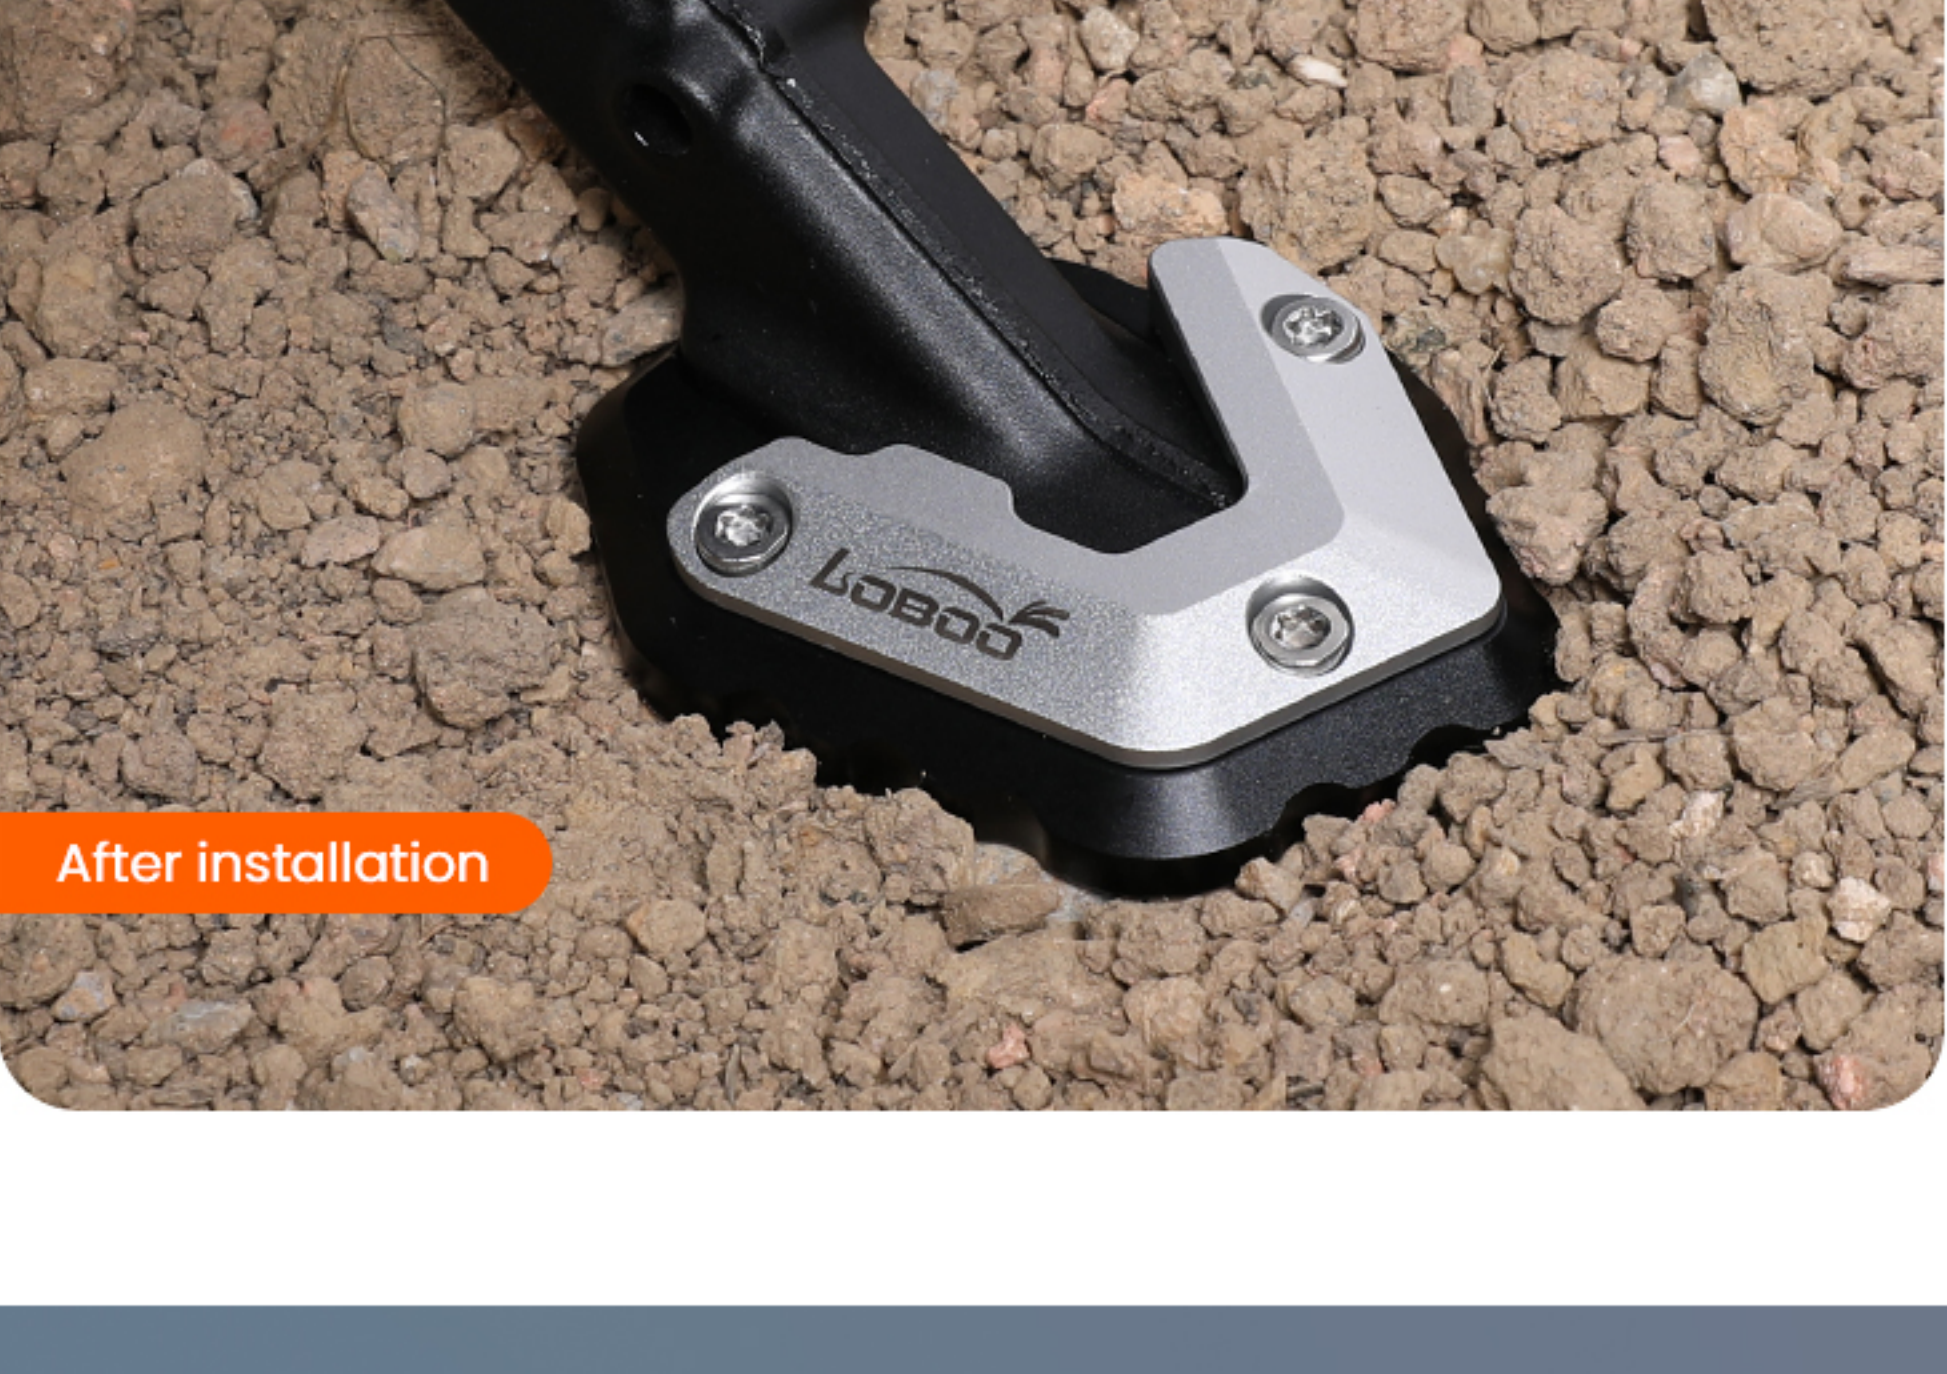

Anti-slip groove design

Side and bottom grooves are designed to improve stability.

Installation display

After installation, it effectively solves the problem that the original side stand foot is easy to sink into the mud and cause the car to fall when parking on unpaved road.
